

**GEK TERNA S.A.**

(hereinafter referred to as the “Company” or the “Issuer”)

**Invitation to the Bondholders of the common bond loan of the amount of €300,000,000 (hereinafter the “CBL 2021”), issued by the Company under the 01.12.2021 Common Bond Loan Issue Programme up to €300,000,000 and Bondholders' Representative Agreement, as amended (hereinafter the “CBL Program 2021”)**

GEK TERNA Group is one of the largest business groups in Greece with significant experience and expertise across the entire range of its activities, which allows it to successfully complete the most complex and demanding projects it undertakes. With an annual turnover of EUR 3.9 billion in 2022, a backlog, including new contracts to be signed, of more than EUR 5.5 billion,<sup>1</sup> installed, under construction and ready for construction RES capacity of 2.5 GW,<sup>2</sup> the largest portfolio of concessions projects in Greece and significant growth prospects in new projects, GEK TERNA Group currently holds a leading position in Greece in the field of infrastructure, clean energy and concessions.

The financial position and prospects of the Group have been significantly improved, since the time of issuance of the CBL 2021, taking into account:

- (A) The successful implementation of the Group’s significant investments which, at the time of the issuance of the CBL 2021, were part of its strategic plan. The said successful target-setting confirms, on the one hand, the stability, continuity and consistency of the Group in the preparation and implementation of its business plan and, on the other hand, leads as a direct result to the assurance and enhancement of the long-term and recurring cash flows received by the Company. Therefore, the Issuer's ability to properly meet its obligations under the CBL 2021 is enhanced, as the Group has now secured or is already developing particularly large-scale landmark projects, such as, for example, the following:
- Attiki Odos, already in operation, is a project of key importance for the domestic road network and especially for Attica as it connects major means of transport (Athens International Airport, other motorways, ports). It is a mature project with a proven track record of strong demand, for which the Issuer has been officially announced as preferred investor.
  - Egnatia Odos, a motorway network with a total length of 883km, which is, among others, a strategically important interconnection between Greece and neighboring countries and for which the Issuer has secured a 35-year concession contract, executed in March 2024.
  - The Integrated Tourism and Entertainment Complex of Hellinikon, which will be the largest complex of its kind in Europe, contributing to the local community and economy while promoting Greek Tourism at an international level. Both the concession contract with the Greek State and the property contract with Hellinikon S.A. have already been signed.
  - The new state-of-the-art 877 MW gas-fired power plant in Komotini, expected to enter commercial operation later this year, whose capacity and strategic location will contribute significantly to the country's energy stability and the gradual transition to cleaner forms of energy. The project is being developed jointly with Motor Oil, while the construction is undertaken by TERNA S.A.
  - Participation in the PPP project of the North Road Axis of Crete (N.O.A.C.), a project of particularly high social welfare and growth contribution for the local community and the

country as a whole. The partnership contract was signed in April 2023, and the project has already entered its first year of the construction period.

- The New International Airport of Heraklion, the second largest airport in the country and one of the main gateways for international tourism, whose construction began in February 2020, and upon completion will be able to serve 15 million passengers per year.
- In the RES sector, the Group is steadily advancing its investment plan with the total capacity of projects in operation, under construction and ready for construction amounting to 2,500 MW.<sup>3</sup> In the electricity and gas trading sector in Greece and abroad, the Group has now established itself as one of the largest private energy providers with HERON ENERGY increasing its market share to 11.6% by the end of September 2023.

In addition to the major projects that the Group has successfully undertaken, its business expansion and solidification of its leading position in the industry is also attributed to the strategic acquisitions and mergers it has undertaken in recent years, such as the increase of its shareholding to 100% in HERON ENERGY and HERON II VIOTIAS in February 2022 and October 2021 respectively.

(B) The remarkable improvement in the Group's financial position and prospects has led to a significant increase in the Issuer's market capitalization, now approaching EUR 1.7 bn compared to approximately EUR 1bn in December 2021 when the CBL 2021 was issued.

The Group's results constitute an undeniable indication of the successful business model implemented by the Management. More specifically, the aforementioned accomplishments and actions have actively contributed to achieving strong financial results with the Group demonstrating significantly enhanced operating profitability for the last 5 years, while the value of its assets and cash is continuously increasing, reaching EUR 6bn on 30.06.2023 (against EUR 4bn as at June 2021) and EUR 1.45bn (against EUR 1bn as at June 2021) respectively.

Taking into account the Group's significantly strengthened financial position based on the above, the strong growth prospects in line with the development of the Greek economy and its significantly enhanced and diversified business plan, the Issuer proposes the amendment of certain terms of the CBL Program 2021, as these terms have only a marginal contribution to the protection of the CBL 2021 Bondholders' interests, while they significantly limit the flexibility of the Group's cash utilization and the efficacy of its business plan. Therefore, in the Company's view, the amendment of these terms constitutes a necessary adaptation of the CBL Program 2021 to its current circumstances and prospects, while ensuring the seamless servicing of the CBL 2021.

In view of all the above, the following proposals are presented:

- (a) Abolishment of the undertaking to maintain the "Total Debt to Equity Ratio" for the "Calculation Periods" after 31.12.2023 and
- (b) increase of the maximum amount of the Company's "Financial Liabilities" from EUR 1,100,000,000 to EUR 1,900,000,000.

Capitalized terms included in this invitation without being defined shall have the same meaning as assigned to them in the CBL Program 2021.

In accordance with conditions 13.1 and 13.2 of the CBL Program 2021, the Board of Directors of the Company invites the Bondholders of the CBL Program 2018 to attend the **Bondholders' Meeting** on **Tuesday, 23.04.2024, at 18:00 p.m.**, which will be conducted as to all Bondholders exclusively by electronic means, without the physical presence of the Bondholders, and in particular remotely via real-
