

PRESS RELEASE

Trastor REIC achieves third LEED GOLD certification in the Logistics Sector

Trastor REIC is pleased to announce the achievement of the prestigious international **LEED GOLD** certification for one more commercial storage and distribution center, with a total area of 8,705 sq.m. in Aspropyrgos, Attica. This achievement establishes Trastor as **a leader REIC in Greece with more than 55,000 sq.m. green-certified investments in the logistics sector.**

The completion of this project further enhances the Company's portfolio with certified "green" buildings, highlighting its commitment to investing in properties that adhere to the highest international environmental standards and support sustainable development. As part of its strategic goals, Trastor aims to significantly increase the share of certified green assets in its portfolio, aiming to more than double growth in their value as a percentage of the total portfolio by the end of 2025.

Mr. Tassos Kazinos, the CEO of the company, stated:

"We are particularly proud to announce the achievement of a LEED GOLD certification for another state-of-the-art logistics center in Aspropyrgos, Attica. This achievement establishes Trastor as a leader REIC in Greece with more than 55,000 sq.m. green-certified investments in the logistics sector, highlighting our commitment to sustainable development. Furthermore, it brings us closer to achieving a significant green portfolio, while simultaneously enhancing the value and competitiveness of our assets. We extend our warmest thanks to all our partners who contributed to this success. We look forward to continuing to deliver projects that drive the future of the logistics sector towards greener and more innovative solutions."
